#### Rationale

S&P Global Ratings assigned its 'AA-' rating to Gettysburg Area School District, Pa.'s series 2016 general obligation (GO) bonds and affirmed its 'AA-' rating on the district's existing GO debt. The outlook is stable.

The district's full-faith-and-credit pledge secures the GO bonds. The Act 1 Index under Pennsylvania commonwealth statute restricts a district's ability to raise the tax levy higher than a certain index, which the Pennsylvania Department of Education determines.

Despite these limitations, we did not make a rating distinction for the limited-tax GO pledge since we believe the district possesses the financial stability necessary to sustain identical ratings on its unlimited- and limited-tax GO bonds.

Officials intend to use series 2016 bond proceeds to advance refund a portion of the district's series 2011 GO debt.

The rating reflects our opinion of the district's:

- Stable property tax base with good incomes and strong wealth;
- · Very strong general fund balance, aided by strong budgetary performance; and
- Moderate debt, tempered by rapid principal amortization.

#### Economy

The 182-square-mile Gettysburg Area School District serves an estimated population of 27,539 in Adams County in south-central Pennsylvania. The median household effective buying income (EBI) in the district is 105% of the national average and the per capita EBI is 92% of the national average, both of which we consider good. At \$79,568 per capita, the 2017 market value totaling \$2.2 billion is, in our opinion, strong. Assessed value (AV) grew by a total of 2.1% since 2015 to \$2.9 billion in 2017. The 10 leading taxpayers make up an estimated 6.9% of AV, which we consider very diverse.

Residents have additional employment opportunities in Harrisburg, York, and Baltimore. Therefore, regional unemployment has historically been below commonwealth and national rates. Although unemployment is not

available for the district itself, county unemployment for calendar 2015 was 4.1%, well below commonwealth and national rates.

The district includes three elementary and two secondary schools. It has another school building that is leased to a charter school. Enrollment has been steady, increasing by 1% since the 2013-2014 school year to 2,891 in the 2016-2017 school year. Officials expect very slight enrollment increases over the next few years, but they report there is ample capacity for more. We do not expect this to have a significant effect on state aid the district could receive because it is mainly wealth driven.

#### **Finances**

The district's available fund balance of \$9.4 million is very strong, in our view, at 17% of general fund expenditures at fiscal year-end June 30, 2015. It reported a surplus operating result of 2.2% of expenditures in 2015.

Including \$6.26 million of committed fund balance management could make available with school board approval, total available fund balance increased to \$15.65 million, or 29.1% of expenditures, which we consider very strong. Total general fund balance increased to \$20.5 million, or a very strong 38.2% of expenditures.

The district has posted general fund surpluses in eight of the past nine audited fiscal years. Officials attribute positive financial performance to conservative budgeting, which helps with the ability to use fund balance for many capital needs instead of issuing debt.

Estimated fiscal 2016 figures show the district posted a \$590,232 general fund surplus that would increase total available fund balance to \$16.9 million, or a very strong 29.5% of estimated expenditures. Total general fund balance would increase to \$21.1 million, or a very strong 36.8% of estimated expenditures.

The fiscal 2017 budget totals \$61.3 million, using \$3.4 million of fund balance appropriation to balance the budget, which the district has done as part of its conservative budgeting. Officials report most line items are currently coming in as expected, and energy costs are currently lower than usual. Although the district has not yet halfway completed the year, it should post another general fund surplus if all goes as expected for the remainder of the year.

#### Management

We consider the district's management practices standard under our Financial Management Assessment methodology, indicating the finance department maintains adequate policies in some, but not all, key areas.

Highlights include management's:

- · Use of historical data and considering future trends when budgeting,
- Budget-to-actual reporting to the school board three times a year,
- · Five-year capital plan that it updates annually,
- · Formal investment policy with monthly investment reports, and
- Formal reserve policy that will not let fund balance fall below 6% of expenditures.

The district currently lacks long-term financial planning and a formal debt policy.

#### Debt

At 5.3% of market value and \$4,187 per capita, overall net debt is moderate, in our view. With 90% of the district's direct debt scheduled to be retired within 10 years, amortization is rapid. Debt service carrying charges were 10% of total governmental fund expenditures (excluding capital outlay) in fiscal 2015, which we consider moderate.

The district issued variable-rate debt in 1997 through the Emmaus Bond Pool and sold its 2008 GO refunding notes to Adams County National Bank (ACNB) through a private-placement transaction. It also issued refunding GO notes in 2015 through a private placement with ACNB. While we believe the standby bond purchase agreement and loan agreement supporting the Emmaus debt expose the district to contingent liquidity risk, we believe that risk is reduced by its very strong internal liquidity. The district does not currently have any new debt issuance planned until fiscal 2021.

#### Pension and other postemployment benefit liabilities

The district contributes to a defined-benefit pension plan administered by the Pennsylvania Public School Employees' Retirement System. In fiscal 2015, it paid its full required contribution of \$4.5 million, or 7.1% of total governmental expenditures, to its pension obligations. The district funds its other postemployment benefits (OPEBs) on a pay-as-you-go basis. In fiscal 2015, it also paid \$235,000, or 0.4% of total governmental expenditures, to its OPEB obligation. Combined pension and OPEB carrying charges totaled 7.5% of total governmental fund expenditures in fiscal 2015.

#### Outlook

The stable outlook reflects S&P Global Ratings' opinion that the district will likely maintain its very strong finances, supported by prudent budgetary practices. We believe the district's stable economy, good incomes, and strong wealth underpin rating stability. While the debt profile indicates some concerns due to the district's exposure to contingent liquidity risks, its ability to manage its debt profile and very strong liquidity help mitigate this uncertainty. Therefore, we do not expect to change the rating over the outlook's two-year period.

#### Upside scenario

If economic indicators were to improve to levels we consider commensurate with the district's peers at a higher rating, barring no weakening of any other rating factors, we could raise the rating.

#### Downside scenario

We could lower the rating if budgetary performance were to weaken, causing reserves to deteriorate to levels we no longer consider very strong.

Pennsylvania is one of 11 states whose ratings Moody's is threatening to cut again.

Pennsylvania pays an extra 0.7% on its debt, compared to AAA- rated Delaware. This results in 25% more in interest costs.

According to a 2016 Official Statement for a Commonwealth of PA General Obligation Bond Issue, the interest cost on PA's General Obligation debt alone is \$558,872,000. That is \$111,774,400 more than the same debt would cost Delaware. That is more than the proposed net increase of \$75,000,000 for Public Education for 2017-2018.
