

# ACCESSING IT'S LEARNING FROM HOME

Go to the Gettysburg School District web site and click on the It's Learning quick access link on the right side of the screen.

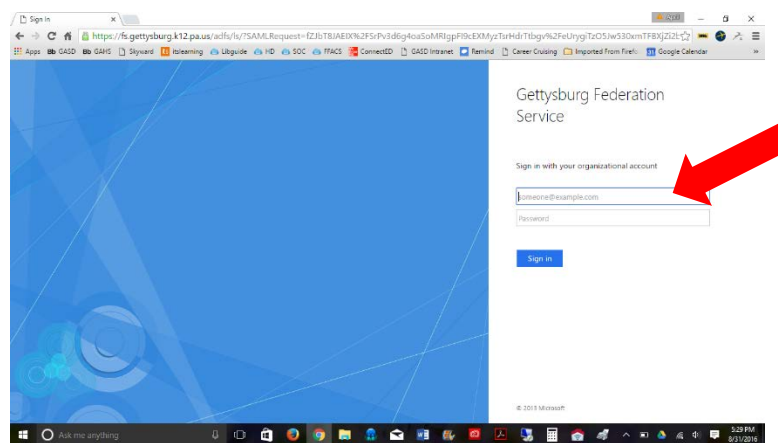

Access the login page by clicking on the "Log in with Gettysburg account" link.

The secure site login is specific to each student. There is currently, no parental account access for the It's Learning course management site. Parents must sign in using their student's login information. Enter the student's login ID followed by the extension @gettysburgschools.org followed by the student's network password. The student's login ID is the first initial, last name, and graduation year.

For example, the It's Learning home login for John Smith graduating in 2020 would be jsmith20@gettysburgschools.org

Please note, security protocol requires that all network passwords be changed every 90 days. The new password will apply to the network, skyward, school email (gasd-pa.org), and the It's Learning logins respectively.
